

Coming for Your Evaluation

SSPC
StoreySmith Pediatric Clinic

Welcome to StoreySmith Pediatric Clinic!

A lot of different children come here to play and practice things that might be hard for them.

We have occupational therapists, physical therapists, and speech therapists that are here to help you!

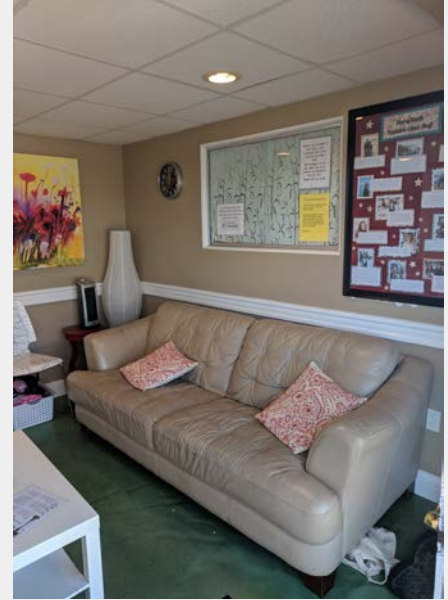

When you get here, you will find a spot in the parking lot to park your car. There's a walkway that leads right to the entrance.

This is the waiting room. There are comfy places to sit and toys and books to use while you wait for your therapist to come get you.

Your therapist will come say hello to you and your grown-up. Your therapist will ask them to fill out some papers, while you come in to do some fun activities.

If you are very nervous about coming in by yourself, your grown-up can come in with you.

There might be other children here while you are here, or there might not.

You will probably be at the clinic for about one or two hours.

You and your therapist might do some fun activities with writing, drawing, playing with blocks or beads, and doing other activities using your hands.

You might also do some fun movements with your whole body, like copying how the therapist moves, or doing the hopscotch.

The therapist will ask your grown-up to come in and talk for a little while. The therapist is going to ask them some questions to get to know you better.

The therapist might ask you some questions, too. If not, then you will be able to play in the clinic while they talk.

After the questions, it
will be time to go.

Great job!
